Who are you?

Your name: ✓

Your computer's name: ✓
The name it uses when it talks to other computers.

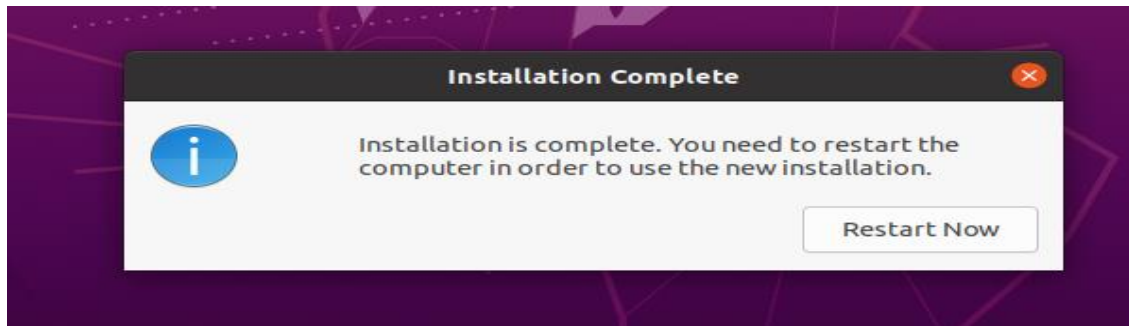

Pick a username: ✓

Choose a password: **Short password**

Confirm your password: ✓

☐ Log in automatically
☒ Require my password to log in
☐ Use Active Directory
You'll enter domain and other details in the next step.

- ✓ After the completion of installation click on “Restart Now” button to restart your guest machine.

Task 03: Install Sublime Text Editor on Ubuntu using Terminal

Step 1: Update the sublime repository

- ✓ Update the Sublime repository by running the command below:
 - **\$ sudo apt update**

Step 2: Download and install related dependencies

- ✓ To add the sublime repository to the system, you will need to install the supporting packages first. Type in the following command:
 - **\$ sudo apt install dirmngr gnupg apt-transport-https ca-certificates software-properties-common**

Step 3: Add the Sublime repository

- ✓ Retrieve its GPG key and add its APT repository with the following commands:
 - **\$ curl -fsSL https://download.sublimetext.com/sublimehq-pub.gpg | sudo apt-key add**
 - **\$ sudo add-apt-repository "deb https://download.sublimetext.com/apt/stable/"**

Step 4: Install Sublime Text 3

✓ Install the Sublime Text 3 text editor by running the command below:

- **\$ sudo apt install sublime-text**

Step 5: Launching the app

- From the CLI, type **subl** to launch Sublime Text editor.
- Or you can head over to the activity's dashboard, type Sublime Text, and then click on the app icon.
