Title: Programming Shell Scripts- V

Aim: Getting practice to write a shell script for Conditional Execution (Decision Making)

Tasks: Working with loops in shell script

Exercise 01: While loop

Syntax:

```
While [ Condition ];  
do  
    #statements  
    #Commands  
done
```

1. Implement a while loop to print the numbers less than 10.
2. Write a shell script to find the sum of digits of a number.
 - a. Prompt the user to enter the number.

Exercise 02: For Loop

Syntax 1: Simple for loop

```
for n in x y z;  
do  
    echo $n  
done
```

Syntax 2: Range based for loop

```
for n in {1..5};  
do  
    echo $n  
done
```

Syntax 3: C-Styled for loop

```
for (( i=1; i<= 7; i++ ));  
do  
    echo $i  
done
```

1. Write a shell script program to print your index number five times using for loop.
2. Modify the above program by applying the three-expression bash for loop syntax.
3. Write a shell script to draw the following pattern using for loop.

```
*  
* *  
* * *  
* * * *  
* * * * *
```

4. Write a shell program to print the digits in reverse order.
 - Prompt the user to enter the number.
 - Display the reverse of the digits of the number the user entered.
